Olivier Rubinger

FULL-STACK SOFTWARE ENGINEER

+5531984121221 olivierrubinger@gmail.com https://linkedin.com/in/olivier-rubinger Belo Horizonte, Brazil

SUMMARY

Experienced Software Engineer with 5 years of experience building clean, scalable applications using React, Next.js, and Node.js. I'm a 24-year-old Brazilian software engineer passionate about modern and efficient solutions. Having lived in Brazil, Canada, and the UAE, I've gained a global perspective that makes me highly adaptable, curious, and comfortable collaborating with multicultural teams.

EXPERIENCE

Full-Stack Software Engineer

Boston, MA

Breach Insurance, Insurance for Crypto

01/2025 - Present

Developing scalable, secure applications in **React/Next.js**, **Node.js**, and **Go** for a leading insurtech in the crypto space. Focused on performance, real-time data, and modern UI/UX.

- Led full overhaul of company website using **Next.js**, **TailwindCSS**, and **TypeScript**, improving load times by 80%.
- Improved app performance by 30% using modern **React** patterns like hooks, **context API**, **Redux Toolkit**, and **React Query**.
- Built real-time data features for risk assessment and alerts in Active Wallet Monitoring using **WebSockets** and **Go** microservices.
- Set up efficient CI/CD pipelines with **Docker** and **GitHub Actions**, streamlining deployments to **Vercel** and improving developer velocity.
- Delivered modern, responsive UI aligned with brand, boosting user engagement.

Full-Stack Software Engineer

São Paulo, Brazil

Qintess, TJPA Court

04/2024 - 03/2025

Worked on modernizing judicial systems through full-stack development using **Angular**, **Vue.js**, and **Java (Spring Boot)**. Focused on building robust, scalable applications to streamline public sector operations.

- Modernized 14+ legacy systems with **Angular**, **Vue**, and **Spring Boot**, improving performance by 40% and greatly enhancing maintainability.
- Redesigned user interfaces to improve accessibility and usability across age groups, increasing user satisfaction scores by 25% and reducing support requests by 30%.
- Led development of complex platforms like **CAPjus** and **Malote Digital**, integrating secure **RESTful APIs** and external services.
- Worked with **OracleDB** and **PostgreSQL** for legacy data handling and new schema creation.
- Actively collaborated with senior developers to enhance architecture and share best practices in **Angular**, **Java**, and **Vue** projects.

Full-Stack Software Engineer (MERN)

Belo Horizonte, MG

Cert Digital Tech

09/2022 - 07/2023

Worked across the MERN stack (**MongoDB**, **Express**, **React**, **Node.js**) to build scalable, full-featured web applications that streamlined business operations and improved user experience.

- Led SQL to NoSQL **MongoDB** migration, improving data flexibility and boosting query performance by 35%.
- Built and optimized responsive **React** interfaces using **TailwindCSS**, enhancing usability across devices.
- Designed and integrated secure **RESTful APIs** with **Express.js**, using **JWT** for authentication and **Insomnia** for API testing.
- Implemented file handling with **AWS S3** and integrated **Firebase Auth** for secure user sessions.

Software Engineer & IT Support Technician

Belo Horizonte, MG

i9 Tecnologia BH

08/2021 - 09/2022

Developed responsive web apps with **React** and **Node.js**, supported IT operations, and contributed to backend development and infrastructure maintenance.

- Built and launched e-commerce site using **React**, **Node.js**, and **Firebase**, increasing online sales by 300%.
- Designed mobile-first interfaces and deployed them using **Nginx** and **Heroku**, improving UX across all devices.
- Provided hands-on IT support and hardware/software maintenance across Windows/Linux environments.
- Integrated APIs and optimized backend performance using **Express**, **MySQL**, and **Redis** for caching and session storage.
